DETAILED ACTION

The finality of the office action mailed 07/11/06 has been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Halliyal et al., U.S. Patent 7,074,677.

Halliyal et al. shows the invention as claimed including a non-volatile memory structure, including: a base 501; a gate dielectric layer (506,508,510) on the base, wherein the gate dielectric layer has an increased electron trapping density and has at least one kind of hetero element (oxygen), other than nitrogen; a gate electrode layer (518, 519) on top of the said gate dielectric layer; and a source/drain electrodes at the base on both sides of said gate dielectric layer (see figs. 5-7 and col. 4-line 49 to col. 6-line 38, particularly col. 6-lines 16-18). Note that the increased electron trapping density will occur during the oxygen anneal when the hetero oxygen element bonds with the nitrogen.

Regarding claim 12, note that the gate dielectric layer from the bottom to the top includes a first oxide layer 506, a nitride layer 508, and a second oxide layer 510.

Response to Arguments

Applicant's arguments with respect to claims 11-12 have been considered but are moot in view of the new ground(s) of rejection.
